European Electronique repeats its success with the Becta Framework

Background

Following an extensive tendering process, [http://www.euroele.co.uk/European Electronique Limited](http://www.euroele.co.uk/European_Electronique_Limited) is delighted to announce that the company has succeeded with its bid to be included on the new Becta ICT Services Framework for both Lot 1 and 2.

This means that the Oxfordshire based business, a leading technology company with more than 20 years experience in ICT and a reputation for innovation, has been selected to provide IT to individual schools and academies under Lot 1. Under Lot 2 European Electronique will be delivering learning platforms and higher-end services across far-reaching projects.

The company is a market leader in the education sector and its presence within the arena is underpinned by its success in the Governments Academy Programme.

The organisation has a major commitment to the Public Sector which represents 70% of its turnover. Its achievements in this area are underpinned by the award of approved supplier status for many of the government and regional procurement frameworks including Buying Solutions.

Chief Executive Officer of European Electronique, Yolanta Gill, said “We are very pleased to be awarded places on both Lots of the BECTA framework. I would like to recognise the effort and hard work of our staff during the tendering process and thank everyone involved. We will continue to offer innovative and cost effective solutions to the education arena and we are confident that the Government’s announcement to channel it’s funding through the Academies Bill and Free Schools will play to the company’s strengths.”
